FRONTEND DEVELOPMENT

Intern Intelligence

ABOUT US

- Intern Intelligence is a pioneering organization dedicated to nurturing interns and achieving ambitious goals. Our mission is to support interns in building successful careers through innovative approaches and unwavering support. We aim to make significant strides and set new benchmarks in the industry, fostering the next generation of leaders.

INSTRUCTION

- ◆ • **ID:** Your unique ID, provided in the offer letter, is crucial. Keep it safe as you will need it for task submission.
- ◆ • **Task Submission Link:** The link for task submission will be emailed to you within approximately one week.

SUBMISSION

- ◆ • **Task Submission:** You will need to complete at least 2 tasks for successful completion of internship.
- ◆ • **Task Completion:** As part of your internship, you will be assigned several tasks. After completing each task, please record a video demonstrating your work and share it on LinkedIn, again using the hashtag **#internintelligence** and tagging **@InternIntelligence**.
- ◆ • **GitHub Repository:** Upload all completed tasks to GitHub. Name your repository in the format **InternIntelligence_ProjectName**.

FRONTEND TASK LIST

You will need to complete at least 2 tasks for successful completion of internship.

(Easy) **TASK 1**

LOGIN PAGE

Task Description: Design a login page according to the guidelines below. The page should be user-friendly, secure, and visually appealing. Ensure that the design is consistent with the overall website theme and meets the required functionality.

Requirements:

- Form Fields: Username/Email, Password, Remember Me checkbox, Login button, Forgot Password link, Sign Up link
- Design: Modern look, consistent colors, subtle animations, responsive
- Functionality: Form validation, clear error messages, secure password handling

API:

- Integrate authentication API with Firebase.

(Easy) **TASK 2**

PORTFOLIO

Creating a personal portfolio is a popular beginner web development project.

Task Description: Create a website design following the guidelines below. Your design should be carefully crafted and consistent in terms of animations, colors, and layout. You have the freedom to use APIs for data retrieval or manually input the data. Note that for the Contact section, having only the design is sufficient.

Example Page: Home

- Introduction: A dynamic and engaging introduction structure.
- Design: An eye-catching and cohesive look with animations and colors.
- Content: A brief overview and access to key information.

Design Requirements:

- Animations: Suitable animations to make the page dynamic and interactive.
- Colors: A harmonious and non-straining color palette throughout the site.
- Layout: Everything should be orderly, accessible, and aesthetically pleasing.
- Overall Aesthetics: A modern, user-friendly, and professional appearance.

API Usage:

- You can use APIs to retrieve data dynamically.
- Alternatively, you may manually input the data.

(Medium) **TASK 3**

MOVIE WEBSITE

Task Description: Develop a movie promotional website that fetches data from APIs like TMDB. The site should include the following features

Pages:

- Home: Display a summary of movies, featured content, and recent updates.
- About: Information about the site or the creators.
- Contact: Contact form or information.
- Movie Details: A page where users can view detailed information about individual movies.
- And other pages like movies, blogs etc.

Design:

- Modern, visually appealing layout.
- Consistent use of colors and animations.
- Responsive design for various devices.

Functionality:

- Integrate with movie APIs (e.g., TMDB) to fetch and display movie data.
- Display detailed movie information on dedicated pages.
- Implement search and filtering options for users to explore movies.

(Advanced) TASK 4

E-COMMERCE WEBSITE

Task Description: Create an e-commerce website with the following features

Pages:

- Home: Show featured products, categories, and promotions.
- Product List: Display products with filters and sorting options.
- Product Details: Detailed view of individual products.
- Cart: Manage and review items in the shopping cart.
- Checkout: Secure checkout process.
- Contact: Contact form or information.

Design:

- Clean and user-friendly interface.
- Consistent branding and responsive layout.

Functionality:

- Integration with a payment gateway.
- Product management and search functionality.
- User account creation and management.

(Advanced) **TASK 5**

BANKING WEBSITE

Task Description: Develop a banking application with the following features. Ensure robust security and user-friendly design.

Pages:

- Dashboard: Overview of account balances, recent transactions, and quick actions.
- Account Details: Detailed view of individual accounts and transactions.
- Transfer Funds: Interface for transferring funds between accounts or to other users.
- Bill Payments: Manage and pay bills.
- Transaction History: Detailed history of transactions with search and filter options.
- Settings: Manage account settings, security options, and personal information.

Design:

- Clean, professional, and secure interface.
- Consistent design with responsive layout.

Functionality:

- API Integration: Use APIs for account data, transactions, and payments. **Firebase or any database you can use.**
- Secure authentication and authorization.
- Real-time transaction updates and notifications.
